Dola
Logistics Web App for delivery   **April 2021**
- This was a tool created to solve one of my friend's problems that involved organizing the data by storing every delivery in a database when texting the carriers.
- Using NodeJS, ExpressJs, MongoDB, MongooseJS, Heroku

Frutivity
Ecommerce App   **Jun 2020 – Dec 2020**
- Focused on small and medium sized farmers addressing the problem of intermediaries in Colombia.
- We decided that a mobile application was the best idea to connect farmers with consumers so I started to learn this framework(Flutter) and ever since, I got connected with programming.
- This mobile app was a demo, we replaced it for a web app using an ecommerce service.
- Using Flutter+Provider, Firebase and Git.
